Research Handbook on Law and Utilitarianism Guillaume Tusseau, 2024-10-03 The Research Handbook on Law and Utilitarianism sheds light on contemporary legal culture and the ways in which it interacts with theories of justice Guillaume Tusseau brings together an interdisciplinary range of scholars to analyse the utilitarian standpoint on legal disciplines and legal governance as well as the contribution of utilitarian arguments to current legal debates **The Idea of Justice**

Amartya Kumar Sen, 2009-09-30 Social justice an ideal forever beyond our grasp or one of many practical possibilities More than a matter of intellectual discourse the idea of justice plays a real role in how and how well people live And in this book the distinguished scholar Amartya Sen offers a powerful critique of the theory of social justice that in its grip on social and political thinking has long left practical realities far behind **Pathologies of Climate Governance** Paul G.

Harris, 2021-02-25 An overview of the obstacles to effective climate governance including international relations national politics and psychosocial factors From Aristotle to Darwin and Back Again Etienne Gilson, 2009 Darwin s theory of evolution remains controversial even though most scientists philosophers and even theologians accept it in some form as an explanation for the variety of organisms The controversy erupts when the theory is used to try to explain everything including every aspect of human life and to deny the role of a Creator or a purpose to life The overreaching of many scientists into matters beyond the self imposed limits of scientific method is perhaps explained in part by the loss of two important ideas in modern thinking final causality or purpose and formal causality Scientists understandably bracket the idea out of their scientific thinking because they seek explanations on the level of material and efficient causes only Yet many of them wrongly conclude from their selective study of the world that final and formal causes do not exist at all and that they have no place in the rational study of life Likewise many erroneously assume that philosophy cannot draw upon scientific findings in light of final and formal causality to better understand the world and man The great philosopher and historian of philosophy Etienne Gilson sets out to show that final causality or purposiveness and formal causality are principles for those who think hard and carefully about the world including the world of biology Gilson insists that a completely rational understanding of organisms and biological systems requires the philosophical notion of teleology the idea that certain kinds of things exist and have ends or purposes the fulfillment of which are linked to their natures in other words formal and final causes His approach relies on philosophical reflection on the facts of science not upon theology or an appeal to religious authorities such as the Church or the Bible *New Perspectives on Malthus* Robert J. Mayhew, 2016-06-20 Marking the 250th anniversary of his birth this wide ranging interdisciplinary study reassesses Thomas Malthus s contested achievements and legacies **International**

Karl Marx and the Philosophy of Praxis Gavin Kitching, 2015-04-17 In this major study first published in 1988 Professor Kitching builds on recent scholarship on Marx and Wittgenstein to provide an incisive readable account and critique of the whole of Marx's work He presents the philosophical economic and political Marx as one thinker and argues that the key to understanding Marx is his commitment to a philosophy of praxis This sees thought as just part of that purposive activity or praxis which distinguishes human beings from other creatures This is the first book to analyse all of Marx's thought from a Wittgenstein perspective in doing so it clarifies and deepens our understanding of Marx

Helix Network Theory Runyuan Gan, 2023-02-08 Based on the philosophy of Systems Science and the law of evolution theory the book by applying the methods of structural functionalism divides the modern social system into human culture economy polity science law education and other sub systems through the systematic synthesis of disciplines such as economics sociology management politics culture theories history and philosophy and explores the connection between these sub systems and their intricate relation with social progress thus depicting the historical trajectory of the long term evolution of human social system Starting from the actual production and operation of the firms the author systematically analyses the organic connections and sophisticated operating process of social reproduction in modern society from micro meso and macro revealing the dynamic structure and evolutionary laws of the social economic system This book reveals the fractal features such as self similarity hierarchy and recursiveness in the general structure of the firm system the sector system and the national economic system thereby integrating micro meso and macro economics into a unified theoretical framework This integration is interdisciplinary and has gone beyond the economics It can be regarded as the fourth grand synthesis in the history of economics after John Stuart Mill 1806 1873 Alfred Marshall 1842 1924 and Samuelson 1915 2009

Women Writing Men Joanne Ella Parsons, Ruth Heholt, 2022-06-08 This book explores how women writers create and question men and masculinity As men have written women so have women written men Debate about how men have represented women in literature has a long and distinguished history however there has been much less examination of the ways in which women writers depict male characters This is clearly a notable absence given the recent rise in interest in the field of 18th and 19th

century masculinities Women writers were in a unique position to be able to deconstruct and examine cultural norms from a position away from the centre This enabled women to look aslant at masculinity using their female gaze to expose the ruptures and cracks inherent within the rigid formation of the manly ideal This collection focuses on women s representations of men and masculinity as they negotiate issues of class gender race and sexuality Women Writing Men 1689 to 1869 will be of interest to academics researchers and advanced students of Literature Gender Studies Critical Theory and Cultural Studies The chapters in this book were originally published as a special issue of Women s Writing

Natural Capital Dieter Helm,2015-05-12 Natural capital is what nature provides to us for free Renewables like species keep on coming provided we do not drive them towards extinction Non renewables like oil and gas can only be used once Together they are the foundation that ensures our survival and well being and the basis of all economic activity In the face of the global local and national destruction of biodiversity and ecosystems economist Dieter Helm here offers a crucial set of strategies for establishing natural capital policy that is balanced economically sustainable and politically viable Helm shows why the commonly held view that environmental protection poses obstacles to economic progress is false and he explains why the environment must be at the very core of economic planning He presents the first real attempt to calibrate measure and value natural capital from an economic perspective and goes on to outline a stable new framework for sustainable growth Bristling with ideas of immediate global relevance Helm s book shifts the parameters of current environmental debate As inspiring as his trailblazing *The Carbon Crunch* this volume will be essential reading for anyone concerned with reversing the headlong destruction of our environment

The Dynamic Society Graeme Snooks,2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought

provoking and controversial conclusions **Global Political Economy** David Reisman,2023-01-20 In his updated second edition David Reisman examines the ideological and material underpinnings of the global mixed economy Drawing upon current research in economics and international relations Global Political Economy is an impartial and comprehensive analysis of the world order in an age of reappraisal and doubt **What Price the Poor?** Ann M. Woodall,2017-05-15 In this fascinating book Ann Woodall investigates and compares the work and thought of William Booth and Karl Marx who both arrived in London in 1849 She draws comparisons between their responses to the intractability of the poverty of the submerged tenth of London s population and argues that Booth s pioneering work in establishing the Salvation Army and the development of Marx s economic theory began in their interactions with the London residuum Each recognised that much of the suffering was caused by the workings of laissez faire capitalism and that its total solution required a challenge to the existing economic system What Price the Poor raises important questions about the relationship between theological discourse and the sociological imagination and it firmly places the development of theoretical and practical social analysis and application within the context of social history It will appeal to all with interests in classical sociology and the history of social activism *The Political Economy of Development* Sadig Rasheed,Siyanbola Tomori,1996 The Association of African Universities and the United Nations Economic Commission for Africa jointly sponsored this study in two volumes The diagnoses and proposals emanate from a distinctively African perspective and the work aims to fill a gap in the literature available on Africa s own views and analysis on unfolding issues concerning the continent s development Volume two focuses on the strategies and policies of African development e g food self sufficiency the challenges of collective self reliant development regional economic cooperation and integration rural transformation in Africa and agricultural development

Environment and Ecology in the History of Economic Thought Vitor Eduardo Schincariol, 2024-07-05 This volume proposes a reconsideration of ecological and environmental aspects of the work and ideas of various heterodox authors and traditions in the history of economic thought including the field of economic development Many of the contributors to this book focus on thinkers and works which are not typically considered as part of the ecological sphere while others consider such economists in a new light or domain Thus the book elucidates a new and useful research field of reconsidering ecological dimensions in the traditional history of economic thought as well as helping to delineate alternative views for ongoing debates on ecological themes Did Veblen Keynes Sraffa C Furtado and other key economists and schools of thought of our age have relevant and useful insights with respect to environmental issues Which aspects of their intellectual legacies should eventually be discarded in the face of our new environmental challenges On the contrary what aspects of their economic theories can be updated and adapted to a better interpretation of our present ecological concerns How do they differ and why The essays contained in this book will help to answer these questions by means of recovering analysing and updating the work of some of the most relevant heterodox economists and schools of thought of our time This book will be of great interest for readers in the history of economic thought ecological economics environmental economics and economic development
