Pavlac, 2017-03-09 Since it first aired in 2011 Game of Thrones galloped up the ratings to become the most watched show in HBO's history It is no secret that creator George R R Martin was inspired by late 15th century Europe when writing A Song of Ice and Fire the sprawling saga on which the show is based Aside from the fantastical elements Game of Thrones really does mirror historic events and bloody battles of medieval times but how closely Game of Thrones versus History Written in Blood is a collection of thought provoking essays by medieval historians who explore how the enormously popular HBO series and fantasy literature of George R R Martin are both informed by and differ significantly from real historical figures events beliefs and practices of the medieval world From a variety of perspectives the authors delve into Martin's plots characterizations and settings offering insights into whether his creations are historical possibilities or pure flights of fantasy Topics include the Wars of the Roses barbarian colonizers sieges and the nature of medieval warfare women and agency slavery celibate societies in Westeros myths and legends of medieval Europe and many more While life was certainly not a game during the Middle Ages Game of Thrones versus History Written in Blood reveals how a surprising number of otherworldly elements of George R R Martin's fantasy are rooted deeply in the all too real world of medieval Europe Find suggested readings recommended links and more from editor Brian Pavlac at gameofthronesversushistory.com

Spatial Intelligence Daniel Ness,Stephen J.

Farenga, Salvatore G. Garofalo, 2017-05-12 Spatial Intelligence examines public and professional conceptions of the relationships between thinking about spatial attributes and active engagement in spatially related constructions and designs. Even though children's and adolescents' spatial propensities in constructive activities parallel the skills needed by professionals in both established and emerging fields, spatial education is often missing from K-12 curricula and is easily impeded by teachers, parents, or other individuals who do not provide contexts in formalized settings such as schools to nurture its potential. This book bridges the gap by linking the natural spatial inclinations, interests, and proclivities of individuals from a variety of cultures with professional training and expertise in engineering, architecture, science, and mathematics. Educators will be better able to achieve the skills and awareness necessary to provide children and young adults with the vital opportunities inherent in spatial education.
