Narrativizing Theories Benjamin John Peters, 2020-02-06 Ours is an age of offense a time of reactionary shock always received never given Ours is an age that has forgone cultural narratives a time of individualism wherein personal identities trump the collective spirit Ours is an age of failing earth a time

of ecological collapse yet the consumption of global capitalism continues to run amok But don't fear You have the correct worldview the best solutions It's not your fault these things are happening It's the president's the immigrant's and the Islamicist's Or perhaps It's the socialist's the tree hugger's and the baby killer's But it's not your fault Never yours For the world exists as you see it in an echo chamber lined with golden pixels Do I still have your attention Then join me Within the covers of *Narrativizing Theories* I dive into ambiguity and aesthetics to depict how clashing worldviews exist side by side yet remain mutually incompatible I examine how cultures distinguish between acceptable and unacceptable beliefs embodiments and identities And I outline an aesthetic theory of ambiguity that highlights through the twists and turns of literature the provisionality of knowledge and the narrativization of reality *Islam, Christianity and Tradition* Ian Richard Netton, 2006-12-22 Offers a unique comparative exploration of the role of tradition in Islam and Christianity The idea of tradition has enjoyed a variety of senses and definitions in Islam and Christianity but both have cleaved at certain times to a supposedly golden age of tradition from the past The author suggests there has been a chain of thinkers from classical Islam to the twentieth century who share a common interest in *ijtihad* or independent thinking Drawing on past and present evidence and using Christian tradition as a focus for contrast and comparison the author highlights the seemingly paradoxical harmony between tradition and *ijtihad* in Islam The author draws on a variety of primary and secondary sources including contemporary newspaper and journal *Trames*, 1997 *The New Isaac* Leroy Andrew Huizenga, 2009 Gospel scholarship has long recognized that Matthean Christology is a rich multifaceted tapestry weaving multifold Old Testament figures together in the person of Jesus It is somewhat strange therefore that scholarship has found little role for the figure of Isaac in the Gospel of Matthew Employing Umberto Eco's theory of the Model Reader as a theoretical basis to ground the phenomenon of Matthean intertextuality this work contends that when read rightly as a coherent narrative in its first century setting with proper attention to both biblical texts and extrabiblical traditions about Isaac the Gospel of Matthew evinces a significant Isaac typology in service of presenting Jesus as new temple and decisive sacrifice *The Postmodern Bible* George Aichele, Fred W. Burnett, Robert M. Fowler, David Jobling, Tina Pippin, Wilhelm Wuellner, Bible and Culture Collective, 1995-01-01 The burgeoning use of modern literary theory and cultural criticism in recent biblical studies has led to stimulating but often bewildering new readings of the Bible This book argued from a perspective shaped by postmodernism is at once an accessible guide to and an engagement with various methods theories and critical practices transforming biblical scholarship today Written by a collective of cutting edge scholars with each page the work of multiple hands The Postmodern Bible deliberately breaks with the individualist model of authorship that has traditionally dominated scholarship in the humanities and is itself an illustration of the postmodern transformation of biblical studies for which it argues The book introduces illustrates and critiques seven prominent strategies of reading Several of these interpretive strategies rhetorical criticism structuralism and narratology reader response criticism and feminist criticism have been instrumental in the

transformation of biblical studies up to now Many feminist and womanist criticism ideological criticism poststructuralism and psychoanalytic criticism hold promise for the continued transformation of these studies in the future Focusing on readings from both the Hebrew Bible and the New Testament this volume illuminates the current multidisciplinary debates emerging from postmodernism by exposing the still highly contested epistemological political and ethical positions in the field of biblical studies

Advances in Visual Semiotics ,2011-12-07 No detailed description available for Advances in Visual Semiotics Semiotic Agency Alexei Sharov,Morten Tønnessen,2022-02-08 This book invites readers to embark on a journey into the world of agency encompassing humans other organisms cells intracellular molecular agents colonies populations ecological systems and artificial autonomous systems We combine mechanistic and non mechanistic approaches in the analysis of the function and evolution of organisms their subagents and multi organism systems and in this way offer a theoretical platform for integrating biosemiotics with both natural science and the humanities social sciences Agents are autonomous systems that incorporate knowledge on how to make sense of their environment and use it to achieve their goals The functions of all agents are supported by mechanisms at the lowest level however the explanatory power of mechanistic analysis is not sufficient for complex agents Non mechanistic methods rely on the goal directedness of agents whose dynamics follow self stabilized dynamic attractors The properties of attractors depend on stable or slowly changing factors and such dependencies

can be interpreted as sign relations if they are adaptive in nature Agents can replace or redirect mechanisms on demand in order to preserve their functions for performing higher level semiotic functions mechanisms are thus only means We assume that mechanism and semiosis are not mutually exclusive and that simple agents can interpret signs mechanistically This assumption allows us to extend semiotic analysis to all agents including ribosomes in cells computers and robots This book challenges established traditions in natural science and the humanities social sciences semiotics no longer appears as restricted to humans and rational thinking and biology is no longer limited to rely exclusively on mechanistic reasoning

Wittgenstein in Translation Dinda L. Gorrée,2012-04-26 Apart from the *Tractatus* Wittgenstein did not write whole manuscripts but composed short fragments The current volume reveals the depths of Wittgenstein's soul searching writings his new philosophy by concentrating on ordinary language and using few technical terms In so doing Wittgenstein is finally given the accolade of a neglected figure in the history of semiotics The volume applies Wittgenstein's methodological tools to the study of multilingual dialogue in philosophy linguistics theology anthropology and literature Translation shows how the translator's signatures are in conflict with personal or stylistic choices in linguistic form but also in cultural content This volume undertakes the impossible task of uncovering the reasoning of Wittgenstein's translated texts in order to construct rather than paraphrase the ideal of a terminological coherence
