Suicide in Modern Literature Josefa Ros Velasco, 2022-01-01 This book analyzes the social and contextual causes of suicide the existential and philosophical reasons for committing suicide and the prevention strategies that modern fictional literature places at our disposal They go through the review of Modern fictional literature in the American and European geographical framework following the rationales that modern literature based on fiction can serve the purpose of understanding better the phenomenon of suicide its most inaccessible impulses and that has the potential to prevent suicide From the turn of the 20th century to the present debates over the meaning of suicide became a privileged site for efforts to discover the reasons why people commit suicide and how to prevent this behavior Since the French sociologist and philosopher mile Durkheim published his study Suicide A Study in Sociology in 1897 a reframing of suicide took place giving rise to a flourishing group of researchers and authors devoting their efforts to understand better the causes of suicide and to the formation of suicide prevention organizations A century later we still keep on trying to reach such an understanding of suicide the nature and nuances of its modern conceptualization to prevent suicidal behaviors The question of what suicide means in and for modernity is not an overcome one Suicide is an act that touches all of our lives and engages with the incomprehensible and unsayable Since the turn of the millennium a fierce debate about the state s role in assisted suicide has been adopted Beyond the discussion as to whether physicians should assist in the suicide of patients with unbearable and hopeless suffering the scope of the suicidal agency is much broader concerning general people wanting to die

Federico Sanchez, 2010-06-15 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the author's fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the who's the how's and the where's of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community's standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnesic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to

suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors *Behind the Mask* Dennis Rozema,2011-02-07 If you're an adolescent dealing with depression anxiety substance abuse or suicidal thoughts you know all about living behind a mask In *Behind the Mask* author Dennis Rozema helps you let go of the mask reveal your true self and become the person you were born to be Using personal examples from his work as a former high school counselor and adolescent therapist Rozema helps teens and those trying to help teens understand the issues troubled youths face *Behind the Mask* examines the following Three of the masks teens wear The despair that lies behind the mask Emotions and behaviors that fuel that despair The relationship of the mask to addictions The importance of love and trust and how they can lead to recovery Steps to make recovery possible *Behind the Mask* shares the personal experiences of adolescents and offers quotes from real journals to illustrate how teenagers' minds work It provides information for young people to throw off their masks and live happier more fulfilling lives *Surviving Suicide* Heather Hays,2005 Days after her fiancé's suicide award winning journalist Heather Hays was back on television hiding her pain from her viewers and herself In this book Heather shares life changing stories from people around the world who have also been left behind **Dealing With Suicide** Rebekah Prewitt,2019-04-20 What does the Bible say about suicide Is it silent on the issue as some claim The Biblical research presented in *Dealing With Suicide* may be surprising You will discover that the Bible both Old and New Testaments has real answers to the tough questions Christians often ask Questions like Why do people commit suicide Did they know what they were doing What does the Bible say about mental illness Where did they go In *Dealing With Suicide* Prewitt also outlines How to help the suicidal Steps the bereaved can take in the aftermath of suicide False teachings to avoid To every thing there is a season a time to heal a time to break down and a time to build up A time to weep and a time to laugh a time to mourn and a time to dance Ecclesiastes 3:1-4

Buleni, 2015-06-05 Knowledge of the truth that is solely found in Gods Word gives and yields faith Faith is however believing something based on promptings by the Spirit of God thus requiring something to believe The New Age movement believes that we can believe things into existence which is not the same kind of faith that we believers should have or dwell on Our faith is based upon the truth in Gods Word Thus knowing what Gods Word has to say about something gives us the ability to believe it Putting Christ as the basis of our faith that will eventually yield results Our faith should be based upon Gods Word Inspirations of Life in Faith is a compilation of models that build a strong base for a Christian life As that will be happening there is evidence of fruits and personal growth in Christs hope of glory For example how can you have faith to pray for healing believing that God will heal you if you didnt know it was Gods will for you to heal Isaiah 53 5 But he was wounded for our transgressions he was bruised for our iniquities the chastisement of our peace was upon him and with his stripes we are healed This is why Satan works so hard to tell the church today that it may not be Gods will for them to be healed Why Because it casts doubt the opposite of faith upon the hearts of Gods children Where there is no doubt it is hard for the devil to function Furthermore how can we receive the promises of God if we dont know what they are We must first know the truth God operates in truth always and then believe it That is biblical faith Mark 9 23 Jesus said unto him if thou canst believe all things are possible to him that believeth We have to believe and trust the Word of God Jesus told his disciples that all things referring to the promises of God are possible for them who trust God You cannot have a successful Christian life without fully trusting in Jesus How can you believe something that nobody told you You cannot It is important to know what the Word of God has to say has said and is saying so that we can believe it Faith comes by hearing Gods Word Romans 10 17 So then faith cometh by hearing and hearing by the word of God I do pray that this publication will not only minister to you but also inspire you to new heights in your walk with the Lord Amen With love Nomusa Buleni Developing Values, Dealing with Issues Dr. Michael J. Teenage Suicide Notes Terry Williams, 2017-02-21 Picturing myself dying in a way I choose myself seems so comforting healing and heroic I'd look at my wrists watch the blood seeping and be a spectator in my last act of self determination By having lost all my self respect it seems like the last pride I own determining the time I die Kyra V seventeen Reading the confessions of a teenager contemplating suicide is uncomfortable but we must do so to understand why self harm has become epidemic especially in the United States What drives teenagers to self harm What makes death so attractive so liberating and so inevitable for so many In *Teenage Suicide Notes* sociologist Terry Williams pores over the writings of a diverse group of troubled youths to better grasp the motivations behind teenage suicide and to humanize those at risk of taking their own lives Williams evaluates young people in rural and urban contexts and across lines of race class gender and sexual orientation His approach which combines sensitive portrayals with sociological analysis adds a clarifying dimension to the fickle and often frustrating behavior of adolescents Williams reads between the lines of his subjects seemingly straightforward reflections on alienation agency euphoria and loss and investigates how this cocktail of emotions can lead to suicide or not Rather than treating these notes as exceptional examples of self expression Williams situates them at the center of teenage life linking them to abuse violence depression anxiety religion peer pressure sexual identity and family dynamics He captures the currents that turn self destruction into an act of self determination and proposes more effective solutions to resolving the suicide crisis
