Freaks of Nature Mark Blumberg, 2008-10-16 In most respects Abigail and Brittany Hensel are normal American twins Born and raised in a small town they enjoy a close relationship though each has her own tastes and personality But the Hensels also share a body Their two heads sit side by side on a single torso with two arms and two legs They have not only survived but have developed into athletic graceful young women And that writes Mark S Blumberg opens an extraordinary window onto human development and evolution In *Freaks of Nature* Blumberg turns a scientist's eye on the oddities of nature showing how a subject once relegated to the sideshow can help explain some of the deepest complexities of biology Why for example does a two headed human so resemble a two headed minnow What we need

to understand Blumberg argues is that anomalies are the natural products of development and it is through developmental mechanisms that evolution works. Freaks of Nature induces a kind of intellectual vertigo as it upends our intuitive understanding of biology. What really is an anomaly? Why is a limbless human a freak but a limbless reptile a snake, a successful variation? What we see as deformities, Blumberg writes, are merely alternative paths for development which challenge both the creature itself and our ability to fit it into our familiar categories. Rather than mere dead ends, many anomalies prove surprisingly survivable as in the case of the goat without forelimbs that learned to walk upright. Blumberg explains how such variations occur and points to the success of the Hensel sisters and the goat as examples of the extraordinary flexibility inherent in individual development. In taking seriously a subject that has often been shunned as discomfiting and embarrassing, Mark Blumberg sheds new light on how individuals and entire species develop, survive, and evolve.

On a September night in 1958 three New Orleans college students went looking for a gay man to assault. They chose Fernando Rios who died from the beating he received. In perhaps the earliest example of the gay panic defense, the three defendants argued that they had no choice but to beat Rios because he had made an improper advance. When the jury acquitted the three, the courtroom cheered. The author offers a detailed examination of the murder and the trial.
