Agricultural Ethics - An Invitation Robert L. Zimdahl, 2020-08-13 I write because I am concerned that I and my agricultural colleagues have avoided addressing the moral dimension of the environmental and social problems we have contributed to I hope for an exchange of ideas about agriculture's moral dilemmas I encourage my readers to engage in a collective conversation about the dilemmas and avoid remaining in what Merton calls the collective arrogance and despair of his own herd If those engaged in agriculture continue to ignore and fail to realize our common difficulties they will be addressed and resolved by societal pressure and political action which may not yield the resolution we favor The book's goal is not to resolve the moral dilemmas raised It is to raise them and encourage thought and discussion It will ask but not answer why nearly all involved in agriculture have not addressed the moral concerns voiced by the general public The agricultural enterprise is committed to the benefits and future success of the present very productive chemical capital and energy intensive system which is in the minds of many not sustainable The internal justification invokes the moral claim that they feed the world's population The question remains whether or not the prevailing moral justification of feeding the world is adequate given all the issues modern developed country agriculture faces pesticides in soil water and food cruelty to animals Biotech GMO's corporate agriculture pollution by animal factory waste exploitation of and cruelty to migrant labor

Reflections on the Role of Ethics in Agriculture Robert Zimdahl,2024-07-01 This volume is an update to *Weed Science A Plea for Thought Revisited* published by Springer in 2012 More than a decade after the first edition ethical discussion on the use of pesticides for weed management is largely absent Startlingly weed science and agriculture have continued on the same path and are still dominated by capital chemical and energy intensive practices including the paralysis of pesticides This second edition expands upon the first using recent data to confirm the dominance of herbicides The revision includes chapters which emphasize the role of ethics in agriculture and the reasons it should but has not yet become part of agricultural education This includes suggestions on how education in agricultural ethics should be shifting and whose responsibility it is The revised version also includes a discussion on the role of genetically modified crops and the consequences of using these crops both positive and negative Scientists have developed a wealth of knowledge they bring to the surface of their disciplinary silos Yet there needs to be greater discussion on the necessity and risks of agricultural science and technology This revised version provides a rigorous examination of weed science s goals and ethics and challenges the way we manage weeds and agriculture *From Field to Fork* Paul B. Thompson,2015-05-08 Paul B Thompson covers diet and health issues livestock welfare world hunger food justice environmental ethics Green Revolution technology and GMOs in this concise but comprehensive study He shows how food can be a nexus for integrating larger social issues in social inequality scientific reductionism and the eclipse of morality *Agroecology* Miguel A Altieri,2018-02-19 This book incorporates new insights and concepts in the hope of helping guide agricultural students researchers and practitioners to a deeper understanding of the ecology of agricultural systems that will open the doors to new management options with the objectives of sustainable agriculture Re-Thinking Organic Food and Farming in a Changing World Bernhard Freyer,Jim Bingen,2014-10-17 This book is based on the assumption that organic has lost its way

Paradoxically it comes at a time when we witness the continuing of growth in organic food production and markets around the world Yet the book claims that organic has lost sight of its first or fundamental philosophical principles and ontological assumptions The collection offers empirically grounded discussions that address the principles and fundamental assumptions of organic farming and marketing practices The book draws attention to the core principles of organic and offers different clearly articulated and well defined conceptual frameworks that offer new insights into organic practices Divided into five parts the book presents new perspectives on enduring issues examines standards and certification gives insights into much discussed and additional market and consumer issues and reviews the interplay of organic and conventional farming The book concludes with a framework for rethinking ethics in the organic movement and reflections on the positioning of organic ethics
