1 1 3 Changing The Equation With The Booming Hispanic Market:

What Fuels the Boom Drives the Bust Jihad Dagher, Mr. Ning Fu, 2011-09-01 We show that the lightly regulated non bank mortgage originators contributed disproportionately to the recent boom bust housing cycle Using comprehensive data on mortgage originations which we aggregate at the county level we first establish that the market share of these independent non bank lenders increased in virtually all US counties during the boom We then exploit the heterogeneity in the market share of independent lenders across counties as of 2005 and show that higher market participation by these lenders is associated with increased foreclosure filing rates at the onset of the housing downturn We carefully control for counties economic demographic and housing market characteristics using both parametric and semi nonparametric methods We show that this relation between the pre crisis market share of independents and the rise in foreclosure is more pronounced in less regulated states The macroeconomic consequences of our findings are significant we show that the market share of these lenders as of 2005 is also a strong predictor of the severity of the housing downturn and subsequent rise in unemployment Overall our findings lend support to the view that more stringent regulation could have averted some of the volatility on the housing market during the recent boom bust episode *The IWSR Drinks Record*, 2007 **American Book Publishing Record**, 2007 **Billboard**, 1984-10-27 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends *From Click to Boom* Lizhi Liu, 2024-11-12 The rise of e commerce has transformed China s economy over the past two decades By late 2020 close to 800 million Chinese people had shopped online and more than 60 million citizens were directly or indirectly employed in e commerce related industries Yet the rapid rise of the industry seems to defy conventional wisdom For instance China s e commerce market took off without strong formal institutions to support it challenging the prevailing notion in political economy that certain formal institutions like state provided secure property rights contract enforcement and the rule of law are crucial pre conditions for supporting efficient markets Using a vast array of qualitative and quantitative data Lizhi Liu reveals how with weak rule of law China instead outsourced part of its institutional functions to e commerce companies themselves prominent examples include Alibaba s Taobao com and Tmall com Liu calls these companies private regulatory intermediaries PRIs and shows how they fulfill various legal social and political functions that the state might otherwise take on Taobao for example has a complex reputation mechanism a credit score a fraud detection program and even a jury like system in which users can adjudicate cases or vote to change platform rules Liu also explores how beyond the systematic level e commerce has significant individual level effects namely that e commerce reduces the household cost of living but also distracts citizens from local political issues Ultimately this project goes beyond traditional analysis emphasizing either the rule of law or informal networks in supporting market development it provides a lens to
