Bell,2016-09-06 How China s political model could prove to be a viable alternative to Western democracy Westerners tend to divide the political world into good democracies and bad authoritarian regimes But the Chinese political model does not fit neatly in either category Over the past three decades China has evolved a political system that can best be described as political meritocracy The China Model seeks to understand the ideals and the reality of this unique political system How do the ideals of political meritocracy set the standard for evaluating political progress and regress in China How can China avoid the disadvantages of political meritocracy And how can political meritocracy best be combined with democracy Daniel Bell answers these questions and more Opening with a critique of one person one vote as a way of choosing top leaders Bell argues that Chinese style political meritocracy can help to remedy the key flaws of electoral democracy He discusses the advantages and pitfalls of political meritocracy distinguishes between different ways of combining meritocracy and democracy and argues that China has evolved a model of democratic meritocracy that is morally desirable and politically stable Bell summarizes and evaluates the China model meritocracy at the top experimentation in the middle and democracy at the bottom and its implications for the rest of the world A timely and original book that will stir up interest and debate The China Model looks at a political system that not only has had a long history in China but could prove to be the most important political development of the twenty first century *Catholic Schools in the Public Interest* Patricia A. Reconceptualizing Securitization in Afghanistan

Arif Sahar, Christian Kaunert, 2024-12-09 This book analyses the securitization of ethnic identities and social groups by the state in Afghanistan in the post 2001 context Securitization is arguably the most successful theoretical framework to analyse security beyond the military confines Yet despite its broadening agenda the securitization framework has been accused of a Western bias This book analyses the extent and the modalities and practices of the securitization of ethnic identities and social groups e g women by the state in Afghanistan post 2001 which is especially relevant following the takeover by the Taliban in August 2021 It puts forward a more nuanced argument by analytically distinguishing and empirically testing state policies practices and perspectives on ethnic and social

groups that are largely informed by the fear and legacies of civil war 1978 2001 The work argues that the traditional lack of a stable state identity that could function as a basis for ontological security in Afghanistan has resulted in a persistent state of fragility exacerbated by the legacies and fears of civil war that have had a direct impact on the development of the state's perspectives on ethnic and social groups Whilst the state does not necessarily indulge in explicit securitization practices and discourses securitization often takes place through implicit activities to undermine ethnic and social groups' ability to enter political economic and socio cultural competitions fairly and equitably which would in turn enable these groups to challenge the state The securitization process therefore has had an impact on the ability of these groups to benefit from opportunities fairly and equitably This book will be of much interest to students of critical security studies statebuilding Asian politics and International Relations in general
