The Star of Bethlehem MR Dwight Reed Hutchison, 2017-10-10 A Jewish and Babylonian Perspective About the Star of Bethlehem The biblical account of the wise men and the star that announced the coming of the Messiah of Israel has inspired

and puzzled people for two millennia Important aspects of Babylonian astronomy seem to be involved in understanding the star s appearing But in addition this short bookl also explores the men and events from a profoundly Jewish perspective The traditional Jewish names of stars and planets Jewish symbols as well as Jewish dates all seem to be keys to unlocking the mystery of the famous star Who were the biblical Magi Various wise men were important in the history of the vast region to the east of Judaea Zoroastrian Babylonian Greek and even Jewish wise men all played a role there in several successive empires A possible Jewish connection with the story of the biblical wise men has been long neglected Tens of thousands of Jews lived in Mesopotamia and Iran when Jesus was born As they came to understand the star the Magi apparently made a connection between aspects of Babylonian astronomy and the Jewish messianic hope Book website www.starofbethlehem.info

Creativity Without Law Kate

Darling, Aaron Perzanowski, 2017-02-28 Behind the scenes of the many artists and innovators flourishing beyond the bounds of intellectual property laws Intellectual property law or IP law is based on certain assumptions about creative behavior The case for regulation assumes that creators have a fundamental legal right to prevent copying and without this right they will under invest in new work But this premise fails to fully capture the reality of creative production It ignores the range of powerful non economic motivations that compel creativity and it overlooks the capacity of creative industries for self governance and innovative social and market responses to appropriation This book reveals the on the ground practices of a range of creators and innovators In doing so it challenges intellectual property orthodoxy by showing that incentives for creative production often exist in the absence of or in disregard for formal legal protections Instead these communities rely on evolving social norms and market responses sensitive to their particular cultural competitive and technological circumstances to ensure creative incentives From tattoo artists to medical researchers Nigerian filmmakers to roller derby players the communities illustrated in this book demonstrate that creativity can thrive without legal incentives and perhaps more strikingly that some creative communities prefer and thrive in environments defined by self regulation rather than legal rules Beyond their value as descriptions of specific industries and communities the accounts collected here help to ground debates over IP policy in the empirical realities of the creative process Their parallels and divergences also highlight the value of rules that are sensitive to the unique mix of conditions and motivations of particular industries and communities rather than the monoculture of uniform regulation of the current IP system
