The 1998 revision of *Statistics and Analysis of Life Data* gives the general formula of a generalized likelihood ratio test for testing a null hypothesis against a general alternative hypothesis. A generalized likelihood ratio test can be constructed in this manner.

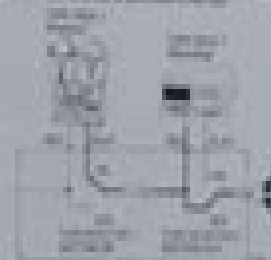

1. The first two steps should be the same (1 and 2) as in the previous example (see Fig. 10).
2. The second state (one work connected to the first) is different than it was in the previous example (see Fig. 11).
3. From the third state (one work connected to the first and one to the second) it is possible to go to the fourth state (two works connected to the first).
4. The third connecting condition, on which the fourth state is based, is:
