Department of Printed Books, 1889 **British Museum Catalogue of printed Books** , 1889 Human Nature vs. Democracy Ludwig M. Auer, 2019-05-21 Modern liberal democracy is praised in a universalistic Western view as the best political system and a quasi prerequisite for full acceptance by the community of traditional hegemonial States However democracy is fully developed in only less than five percent of States globally and in decline in most Western countries In this book democracy is presented as a political system in danger due to its intrinsic flaws and tendency to self destruction The major flaw is that human nature is not adequately considered in democracy s conception its citizens We the people as individuals and as crowds are liberated into a dangerous ideology prioritizing freedom from society over membership in society and thereby causing decline in libertinism hedonism and polarization in divided and finally broken societies Proposals to resolve the rapidly growing crisis include education of citizens into the ethics of reciprocal altruism grounded in evidence from biological sciences and humanities professionalization of politics and a fundamental change of politics towards evidence based decision making thus ending politicking politicians personality affairs and the cold war of political parties the

Catalogue of Printed Books , 1889 *The Origins of the Idea of Scientific Progress* Daniel Špelda, 2024-06-21 This volume offers a new interpretation of the genesis of the idea of scientific progress in early modern science and philosophy The interpretation argues that the idea of scientific progress was not a historical category but an epistemological one The main thesis of the book posits that the idea of scientific progress was a methodological means of dealing with the contingency of nature To illustrate the novelty of the idea the individual chapters compare several features of Renaissance natural philosophy with a new regime of knowledge that included time as an inevitable factor of empirical research The temporal regime of knowledge is illustrated by the work of Bernard de Fontenelle and his colleagues at the Acad mie des sciences in Paris at the end of the 17th century The new interpretation remedies a gap in recent scholarship where the idea of scientific progress has been overlooked even though the early modern natural philosophers themselves used it to describe the nature of their research The book places both well known texts and less studied documents in a new light thus contributing to the lively and rich debate on the origins and nature of early modern science and philosophy It is of interest to scholars studying the history of early modern philosophy and science *Incest, Drama and Nature's Law, 1550-1700* Richard A.

McCabe,2008-10-30 This is a full length study of incest in English Renaissance and Restoration drama Richard McCabe s comprehensive survey offers a literary history of this theme informed by an investigation of the intellectual background with particular emphasis on changing concepts of natural law and consequent reassessments of classical tradition It examines a wide range of theological philosophical legal and literary sources in the context of modern psychological and sociological theories of family development Extensive comparisons with classical models and contemporary European dramatists from Tasso to Corneille and Racine explore the volatile association between dramatic form and emotional content structural experiment and sexual ambivalence The centrality of the family to all human relationships and the mutual reflection of familial politics and the patriarchal state make incest a powerful metaphor for the ambivalence of all concepts of natural authority and for various forms of social and political revolt
