The Rise and Fall of Social Psychology Augustine Brannigan, 2017-07-05 This unflinching effort critically traces the attempt of social psychology over the past half century to forge a scientific understanding of human behavior based on the systematic use of experiments Having examined the record from the inception of the field to the present Brannigan suggests that it has failed to live up to its promise that social psychologists have achieved little consensus about the central problems in the field that they have failed to amass a body of systematic non trivial theoretical insight and that recent concerns over the ethical treatment of human subjects could arguably bring the discipline to closure But that is not the disastrous outcome that Brannigan hopes for Rather going beyond an apparent iconoclasm the author explores prospects for a post experimental discipline It is a view that admits the role of ethical considerations as part of scientific judgment but not as a sacrifice of but an extension of empirical research that takes seriously how the brain represents information and how these mechanisms explain social behaviors and channel human choices and appetites What makes this work special is its function as a primary text in the history as well as the current status of social psychology as a field of behavioral science The keen insight touched by the gently critical styles of such major figures as Philip Zimbardo Morton Hunt Leon Festinger Stanley Milgram Alex Crey Samuel Wineburg Carol Gilligan David M Buss among others makes this a perfect volume for students entering the field and no less a reminder of the past as well as present of social psychology for its serious practitioners Routledge Handbook on Transnational Commercial Law Bruno Zeller, Camilla Baasch Andersen, 2025-02-21 This handbook edited by Zeller and Andersen is an indispensable contribution to the field of transnational commercial law With an introduction by Sir Roy Goode this book presents perspectives on legal issues of international sales transactions as perceived by world leading experts exposing pragmatic and modern aspects of everything from drafting to uniform laws to dispute resolution The book divides itself between fundamental knowledge of transnational commercial law e g chapters on forum shopping CISG Cape Town

Convention etc and current and topical developments e g chapters on blockchain smart contracts metaverse digital assets etc International or transnational trade during the past twenty years has become more and more important outstripping domestic trade as a hallmark of economic success Model laws developed by the United Nations and other international bodies are now being transplanted or ratified by countries so a translational element must always be considered as part of any choice of law Addressing a global audience as the instruments dealt with herein apply to many states in different regions this handbook aims not only at an undergraduate and graduate student audience but also will interest professional lawyers

Handbook for Teaching Introductory Psychology Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association Volume III contains 89 articles from TOP that have not been included in other volumes Another distinction between this volume and its predecessors is its emphasis on testing and assessment The book is divided into two sections Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology

The Principle of National Treatment in International Economic Law Anselm Kamperman Sanders, 2014-10-31 The principle of national treatment or the non discrimination clause is a principle that applies across many fields of international economic law This book offers a unique horizontal examination of the principle as it applies within international tr

International Criminal Law Douglas Guilfoyle, 2016 This unique textbook provides an accessible introduction to a fascinating subject area Written with student needs at its heart innovative features such as Counterpoint and Pause for reflection boxes highlight current debates and areas worthy of more detailed analysis providing students with the tools they need to develop their knowledge and start thinking critically about the law Learning outcomes open each chapter and are complemented by closing summaries to further support student understanding Structured in four parts the book first sets out the key international law

principles which assume special significance in relation to international criminal law before going on to consider international criminal tribunals the prosecution of international crimes and the core international crimes which have been prosecuted to date Finally consideration is given to issues such as legal defences and immunities under international law Written by an outstanding scholar and teacher this user friendly text offers a unique approach to the subject area making it the ideal choice for those new to the subject area Online Resource Centre This book is accompanied by a free Online Resource Centre hosting links to key international law documents additional material on the victims of crime and updates on important developments within the subject area
