Wittgenstein and Naturalism Kevin M. Cahill, Thomas Raleigh, 2018-01-17 Wittgenstein was centrally concerned with the puzzling nature of the mind mathematics morality and modality He also developed innovative views about the status and methodology of philosophy and was explicitly opposed to crudely scientific worldviews His later thought has thus often been understood as elaborating a nuanced form of naturalism appealing to such notions as form of life primitive reactions natural history general facts of nature and common

behaviour of mankind And yet Wittgenstein is strangely absent from much of the contemporary literature on naturalism and naturalising projects This is the first collection of essays to focus explicitly on the relationship between Wittgenstein and naturalism The volume is divided into four sections each of which addresses a different aspect of naturalism and its relation to Wittgenstein's thought The first section considers how naturalism could or should be understood The second section deals with some of the main problematic domains consciousness meaning mathematics that philosophers have typically sought to naturalise The third section explores ways in which the conceptual nature of human life might be continuous in important respects with animals The final section is concerned with the naturalistic status and methodology of philosophy itself This book thus casts a fresh light on many classical philosophical issues and brings Wittgensteinian ideas to bear on a number of current debates for example experimental philosophy neo pragmatism and animal cognition ethics in which naturalism is playing a central role
