Secondary Cities and Local Governance in Southern Africa Abraham R. Matamanda,James Chakwizira,Kudzai Chatiza,Verna Nel,2024-01-16 This book is the first to consider the roles challenges and governance responses of secondary cities in southern Africa to changing circumstances Among the challenges are governance under conditions of resource scarcity managing informality the effects and responses to climate change and the changing roles of the cities within the national

space economy It fills the gap in the literature on secondary cities with original case studies drawn from South Africa Zimbabwe and Mozambique The authors are all African scholars working and living in the region with intimate knowledge of the settings they describe The book is critical as it includes such regional case studies of different secondary cities in Southern Africa but also because of its multidisciplinary it contains substantive and pertinent issues such as climate change disaster management local economic development and basic services delivery It considers diverse environments yet with similar challenges that could provide useful policy and governance proposals for other cities Injustice at Work

Francois Dubet, 2015-12-03 Though it is difficult to describe what a just world should be everyone is able to denounce injustice when he/she is a victim or a witness of it Based on a long term study of workers this new book tests and expands upon prevailing theories of justice by Rawls Nozick Taylor Walzer and other important philosophers Injustice at Work describes the way workers perceive social injustice It reveals why they so often feel unequal scorned dominated and alienated at work The book develops three principles of justice equality merit and autonomy showing how individuals combine them in singular moral and social experiences that constitute people's relation to society Dubet also shows in a liberal and globalized society why it has become more and more difficult to denounce the social causes of injustice and fight them **Last Sardana** Ray Harwood, 2015-07-28 With linked hands the human circle perambulated moving to the left in the precise step sequences that had been the format through centuries of performance Last Sardana begins the story of a mother Maria Martinez and 12 year old son Pedro with modest beginnings in Rosas a Spanish Costa Brava fishing village Set in the fifties Maria was widowed by a tragic disaster at sea Together they uproot south to be under the wing of her brother in law who is developing an hotel on the Martinez family land Maria and Pedro in their separate ways become pivotal to that There Pedro is exposed to the University of Life through adolescence itself His creative talent is encouraged and exposed as are the challenges of a veritable fan club of contemporary girlfriends discovering their own emotions and playing with his Diverse characters comprising the initial hotel clientele enter his life as do a field of sunflowers and a deaf mute boy whose great artistic talents Peter discovers to take into the future Maria finds new and exciting love too **Journal of the Senate of**

the United States of America United States. Congress. Senate, **Discombobulation** Wayne Rudolph Davidson, 2015-09-16 Wayne Rudolph Davidson delves deeper into his family history in this second book of his When Clans Collide trilogy Exploring his own personal branch that stems from the genealogical trunk of the distinguished Davidson family tree he writes from the perspective of an African American male born in the post World War II era caught in a firestorm of extraordinary social change civil disturbance and a burgeoning drug culture His life runs in tandem with the migration of African Americans from the rural South to urban centers in the North and historic events such as the assassinations of President John F Kennedy Malcolm X the Rev Martin Luther King Jr and Senator Robert F Kennedy He seamlessly blends his family genealogy and his own mistakes and triumphs with American history From being an unemployed

autoworker living and working in a dark tunnel to positions of responsibility and authority as a member of the U S Army in strategic places around the world in this book the author gets a chance rarely given to African American men to tell his story before his peers instead of before a magistrate

Experimenting on a Small Planet William W. Hay,2021-09-27 This book is a thorough introduction to climate science and global change The author is a geologist who has spent much of his life investigating the climate of Earth from a time when it was warm and dinosaurs roamed the land to today s changing climate Bill Hay takes you on a journey to understand how the climate system works He explores how humans are unintentionally conducting a grand uncontrolled experiment which is leading to unanticipated changes We follow the twisting path of seemingly unrelated discoveries in physics chemistry biology geology and even mathematics to learn how they led to our present knowledge of how our planet works He explains why the weather is becoming increasingly chaotic as our planet warms at a rate far faster than at any time in its geologic past He speculates on possible future outcomes and suggests that nature itself may make some unexpected course corrections Although the book is written for the layman with little knowledge of science or mathematics it includes information from many diverse fields to provide even those actively working in the field of climatology with a broader view of this developing drama Experimenting on a Small Planet is a must read for anyone having more than a casual interest in global warming and climate change one of the most important and challenging issues of our time This new edition includes actual data from climate science into 2021 Numerous Powerpoint slides can be downloaded to allow lecturers and teachers to more effectively use the book as a basis for climate change education
