Hillis, 2013-05-13 This distinctive handbook is a key reference for both clinicians and researchers working in the scientific investigation of aphasia The focus is on how the study of acquired language disorders has contributed to our understanding of normal language and its neural substrates and to the clinical management of language disorders The handbook is unique in that it reviews studies from the major disciplines in which aphasia research is conducted cognitive neuropsychology linguistics neurology neuroimaging and speech language pathology as they apply to each topic of language For each language domain such as reading there is a chapter devoted to theory and models of the language task a chapter devoted to the neural basis of the language task focusing on recent neuroimaging studies and a chapter devoted to clinical diagnosis and treatment of impairments in that domain *Aphasia — A Social Approach* Lesley Jordan, Wendy Kaiser, 2013-11-11 The social model of disability emerged from the work of the Union of the Physically Impaired Against Segregation UPIAS who published *The Fundamental Principles of Disability* in 1976 Central to this were two themes that it was the experience and expertise of disabled people that was crucial in developing a true understanding of the phenomenon of disability and that the main problems of disabled people were externally located in the disabling barriers and social restrictions that they faced Building upon these themes and the rigid distinction between impairment and disability that the *Fundamental Principles* insisted upon I further developed the social model as the basis of more appropriate professional practice as part of my own work in teaching disability issues to social workers Oliver 1983 Subsequently the social model became the accepted vehicle for the promotion and development of disability equality training Campbell and Gillespie Sells 1991 and the basis of the collective self organization of disabled people into a powerful political movement Campbell and Oliver 1996 Outside of social work the impact of the social model of disability on professional consciousness let alone practice has been somewhat limited **34th Clinical Aphasiology Conference** Holland, 2005 This special issue of Aphasiology represents the papers accepted for publication which were among those presented at the 34th Clinical Aphasiology Conference held in Park City Utah in 2004 They have been peer reviewed and selected by a distinguished group of ad hoc editorial consultants from among the considerably larger number of papers and posters presented at the meeting itself **Group Treatment of Neurogenic Communication Disorders: the Expert Clinician's Approach, Second Edition** Roberta J.
