Reading Postcolonial Literature Hayley G. Toth, 2025-03-10 An Open Access edition is available thanks to the kind sponsorship of the libraries participating in the Jisc Open Access Community Framework OpenUP initiative

Debates about reading in postcolonial studies rarely discuss non professional readers except to secure the authority of professional reading practices In *Reading Postcolonial Literature* Hayley G Toth places non professional reading practices in dialogue with received academic wisdom to debunk common sense assumptions about non professional readers as Western or neocolonial consumers Drawing on reading practices recorded in academic books journal articles and on online book reviewing platforms like Amazon and Goodreads Toth draws attention to important continuities between professional and non professional practices of reading postcolonial literature At the same time she highlights that non professionals often have little desire to emulate the practices of professional postcolonial critics Precisely by not adopting the established protocols and methods of postcolonial studies non professional readers call attention to the limits of dominant approaches to reading in the discipline Across four chapters Toth examines the relationship between reading and identity during the Rushdie affair the difference between reading and address the challenges posed by difficult texts and the legitimacy of non understanding and the reception of popular texts primarily read by non professional audiences *Reading Postcolonial Literature* demonstrates that reception matters in any claims we make about the value of reading postcolonial literature and offers new ways forward for the practice study and teaching of reading in the discipline

Bloomfield, 2018-05-15 Originally published in 1987 when Artificial Intelligence AI was one of the most hotly debated subjects of the moment there was widespread feeling that it was a field whose time had come that intelligent machines lay just around the corner Moreover with the onset of the revolution in information technology and the proclamation from all corners that we were moving into an information society developments in AI and advanced computing were seen in many countries as having both strategic and economic importance Yet aside from the glare of publicity that tends to surround new scientific ideas or technologies it must be remembered that AI was a relative newcomer among the sciences that it had often been the subject of bitter controversy and that though it had been promising to create intelligent machines for some 40 years prior to publication many believe that it had actually displayed very little substantive progress With this background in mind the aim of this collection of essays was to take a novel look at AI Rather than following the path of old well trodden arguments about definitions of intelligence or the status of computer chess programs the objective was to bring new perspectives to the subject in order to present it in a different light Indeed instead of simply adding to the endless wrangling for and against AI the source of such divisions is made a topic for analysis in its own right Drawing on ideas from the philosophy and sociology of scientific knowledge this collection therefore broke new ground Moreover although a great deal had been written about the social and cultural impact of AI little had been said of the culture of AI scientists themselves including their discourse and style of thought as well as the choices judgements negotiations and competitive struggles for resources that had shaped the genesis and development of the paradigmatic structure of their discipline at the time Yet sociologists of science have demonstrated that the analysis of factors such as these is a necessary part of understanding the development of scientific knowledge Hence it was hoped that this collection would help to redress the imbalance and provide a broader and more interesting picture of AI **Nineteenth Century Readers' Guide to Periodical Literature, 1890**
