The Kyoto Protocol Sebastian Oberthür, Hermann E. Ott, 1999-10-20 The adoption of the Kyoto Protocol in December 1997 was a major achievement in the endeavour to tackle the problem of global climate change at the dawn of the 21st century After many years of involvement in the negotiation process the book's two internationally recognised authors now offer the international community a first hand and inside perspective of the debate on the Kyoto Protocol The book provides a comprehensive scholarly analysis of the history and content of the Protocol itself as well as of the economic political and legal implications of its implementation It also presents a perspective for the further development of the climate regime These important features make this book an indispensable working tool for policy makers negotiators academics and all those actively involved and interested in climate change issues in both the developed and developing world **The Kyoto**

Protocol Christophe P. Vasser, 2009 This book is devoted to the The Kyoto Protocol which is a significant protocol to the international Framework Convention on Climate Change with the objective of reducing greenhouse gases that cause climate change It was adopted on 11 December 1997 by the 3rd Conference of the Parties which was meeting in Kyoto and it entered into force on 16 February 2005 As of June 2008 182 parties have ratified the protocol Of these 36 developed countries plus the EU as a party in its own right are required to reduce greenhouse gas emissions to the levels specified for each of them in the treaty representing over 61.6% of emissions from Annex I countries with three more countries intending to participate One hundred thirty seven 137 developing countries have ratified the protocol including Brazil China and India but have no obligation beyond monitoring and reporting emissions The Kyoto Protocol separates countries into two groups Annex I includes developed nations while Non Annex I refers to developing countries Emission limitations are only placed on Annex I countries Non Annex I nations participate by investing in projects that lower emissions in their own countries For these projects they earn carbon credits These credits can be traded or sold to Annex I countries which allow them a higher level of maximum carbon emissions for that period *The Kyoto Protocol* Michael Grubb, Christiaan Vrolijk, Duncan Brack, 1999 A

concise and authoritative guide to the evolution terms and implications of the Kyoto Protocol this book provides an economic and political account of key policy debates and their outcome It also explains the meaning of provisions on emissions trading and other flexibility mechanisms and provides a quantitative analysis using the emissions trading model devised by the RIIA's Energy and Environmental Programme *The Kyoto Protocol* Sebastian Oberthür, Hermann E. Ott, Farhana Yamin, European Commission. Directorate-General for the Environment, 1999 **The Kyoto Protocol in the EU** Leonardo

Massai, 2011-05-04 The participation of the European Community and the Member States in the international climate change regimes is a complex issue In the case of the Kyoto Protocol this is rendered more complicated by the fact that for the purposes of Article 4 of the Kyoto Protocol the membership of the European Community and Member States is frozen at a particular point in time The result of this is that under International Law the European Community and a part of the Member

States EU15 have agreed to jointly fulfil some of those obligations whereas under Community Law all Member States share a certain degree of responsibility to meet the obligations created by the Kyoto Protocol This book analyses in great detail the Kyoto Protocol and its obligations as well as the discrepancies between International Law and Community Law in that regard The book is a useful tool for academics practitioners consultants and all stakeholders operating in the field of environmental law and climate change Leonardo Massai is a legal expert and lecturer in International and EU Environmental Law and Climate Change

increasingly amount of greenhouse gases is released into the atmosphere causing the ecological balance to become incrementally out of order The impact can be already felt today as temperatures are rising and this is likely to bring about changes for nature including the human beings and many other species Although the global climatic change is unlikely to be stopped medium term because carbon dioxide the greenhouse gas with the largest quantity in the air is said to have a 100 years lifetime span in atmosphere the effects of the worldwide warming can be mitigated In the early 1990 s this environmental issue was picked up and first steps for global climate policies were made In 1997 the diplomatic efforts led to the resolution of the so called Kyoto protocol which obligates the member states to reduce its greenhouse gas emissions This result can still today be seen as a milestone in the international climate policy Therefore this agreement will be the subject of examination on the following pages The author will firstly describe the rationale behind the protocol before underlining its main provisions for developed and less developed countries Moreover the effectiveness of the treaty will be critically evaluated and finally emphasize will be also given to the impact it has on my home country Germany
