Art Body Contouring Comprehensive Approach:

The Art of Body Contouring Al Aly, Fabio Nahas, 2017-07-12 This book encompasses body contouring procedures for patients of various body types. The addition of Dr Nahas as an editor reflects the significant contributions to the art of body contouring from Brazil and other South American countries and the book contains the insight of some of the true innovators from this part of the world. Chapters are organized in a consistent format and the book is beautifully illustrated with over 1000 illustrations. Numerous operative videos are included documenting the procedures in the book. *Comprehensive Body Contouring* Dennis Hurwitz, 2015-09-24 This up to date discourse on body contouring surgery is based on the experience of a plastic surgeon who is renowned as an innovator and repeatedly reports excellent results. Patient selection, preparation, surgical procedures and aftercare are presented for those desiring body contouring after massive weight loss, pregnancy and/or aging. The emphasis is on technique which is precisely described and filmed and the videos are full length and divided into brief segments. *Comprehensive Body Contouring* is a thorough discussion of the surgical principles presented and referred to throughout the text. Brachioplasty, mastopexy, breast augmentation, upper and lower body lifts, buttockplasty, thighplasty, the full gamut of lipoplasties and the coordination of these procedures are described in detail. Technique and decision making are contrasted with the writings of other well known authors. Standardized images and analysis of evaluations and reported complications support the conclusions.

Body Contouring Melvin A. Shiffman, Alberto Di Giuseppe, 2010-09-14 As plastic surgeons we seek to combine art and science to improve the results we see in clinical practice. Through our artistic sensibilities we try to understand and obtain aesthetic results. Scientific analysis provides the data to predict which approaches will be successful and safe. Both art and science connote a high level of skill or mastery. At the present time our literature is replete with descriptions of specific procedures for body contouring. However, there remains a need for a definitive reference describing the basic principles to address the complete scope of body contouring including the postbariatric patient and their plastic surgery deformities. Dr Shiffman and Dr Di Giuseppe saw this need and sought to address the needs of plastic surgeons faced with the complexities of body contouring surgery. This is a comprehensive text aimed at providing multiple perspectives. The numerous sections which include a posity and lipolysis, the breast, abdomen, chest and buttocks, the extremities and liposuction offer various approaches from the foremost authors. Indeed, it is with a tremendous amount of skill and mastery that Dr Shiffman and Dr Di Giuseppe have successfully edited and collated the numerous contributions to this work. In addition, they have authored individually or in collaboration over a dozen of the 87 total chapters. Their combined work as editors and authors are evident throughout their text. The final result is a comprehensive contribution that will benefit all plastic surgeons seeking to improve their approach to body contouring.

Teaching Integrated Arts in the Primary School Anne Bloomfield, John Childs, 2013-12-16 First Published in 2000. This book reasserts the place of the arts, dance, drama, music, and the visual arts in the primary school curriculum at Reception and Key Stages 1 and 2. It acknowledges the time constraints in a crowded curriculum and stresses a common developmental approach to the different forms of creative and aesthetic expression. The arts are presented as the vital 4th R, integrated modes of learning alongside Reading, Writing, and Arithmetic, where children can absorb and express ideas, feelings, and attitudes. Supported by illustrations, examples of work, a glossary of terms, appendices of addresses for resource materials, and further reading, the work will stimulate and give confidence as a course textbook for student teachers and as a professional handbook for practitioners including arts coordinators, advisory teachers, and artists working in educational settings. Clear guidance is given on the development of a personal, autonomous teaching style and on evaluating and monitoring children's progression in skill acquisition, creative production, and critical response.
