Soviet-American Dialogue on the New Deal Otis L. Graham, 1989 The study of U S history has flourished in the Soviet Union during the last several years with much research being published in Soviet journals Since those journals have very limited circulation in the West and since few U S scholars read Russian the Soviet vantage point on American history which often differs considerably from the view of U S scholars has been mostly inaccessible In this volume the first in a series scholars from both nations have cooperated to rectify part of that deficiency by examining one of the most significant decades in American history the 1930s Eleven essays by Soviet historians that were originally published in Soviet journals have been translated into English eight American historians have responded with commentary on those essays and the Soviets have written brief rejoinders The volume thus presents a unique opportunity to learn the contours of Soviet writings on the New Deal to take account of their preoccupations and conclusions and then to read the appraisals of noted U S scholars

New Approaches to Latin American History Richard Graham, Peter H. Smith, 2014-08-27 New Approaches to Latin American History incorporates methods and concepts from the social sciences without abandoning a distinctively historical approach A collection of original essays by distinguished younger scholars it proposes original concepts and methods for analyzing crucial problems in Latin American history Using as examples such subjects as slavery dictatorship immigration and the relationship between land

ownership and political power the contributors show how approaches and techniques from psychology political science economics and sociology can be applied to historical studies The papers attempt to explain the thematic and substantive importance of the particular problems at hand describe and evaluate standard approaches to them propose original hypotheses suggest methods for testing the hypotheses or indicate major methodological or conceptual difficulties that have so far hampered such work Despite their diversity of content the papers show strong underlying unities First they all point to the need for placing institutions and actions in a broad societal context The authors present an implicit cumulative argument against the excessive isolation of historical phenomena Second they demonstrate the utility of interdisciplinary research Third they issue an implicit call for rigorous comparative analysis The propositions formulated in these essays can best tested and modified in comparative fashion Ultimately this book deals with the exposition of a research style a style based on systematic doubt an awareness of the need for conceptual rigor and a willingness to try new methodologies For this reason it is of interest to historians in every field as well as to students of Latin America
