

Lesson 2.5

61

Name _____

Multiply Using the Distributive Property

➤ **Essential Question** How can you use the Distributive Property to multiply a 2-digit number by a 1-digit number?

Investigate

Materials • color pencils, grid paper

You can use the Distributive Property to break apart numbers to make them easier to multiply.

➤ The **Distributive Property** states that multiplying a sum by a number is the same as multiplying each addend by the number and then adding the products.

- A.** Outline a rectangle on the grid to model 6×13 .
B. Think of 13 as $5 + 8$. Break apart the model to show $6 \times (5 + 8)$. Label and shade the smaller rectangles. Use two different colors.

Use the Distributive Property. Find the product each smaller rectangle represents. Then find the sum of the products. Record your answers.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

- C.** Model 6×13 again. Think of 13 as a different sum. Break apart the model to show $6 \times (\underline{\quad} + \underline{\quad})$. Find the product each smaller rectangle represents. Then find the sum of the products. Record your answers.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\begin{array}{r} 5 \times 25 \\ 5 \times 20 = 100 \\ 5 \times 5 = 25 \\ \hline 125 \end{array}$$
