Full Equations (FEQ) Model for the Solution of the Full, Dynamic Equations of Motion for One-dimensional Unsteady Flow in Open Channels and Through Control Structures Delbert D. Franz, Charles S. Melching, 1997 Phenomenology of Polymer Solution Dynamics George D. J. Phillies, 2011-10-06 Presenting a completely new approach to examining how polymers move in non dilute solution this book focuses on experimental facts not theoretical speculations and concentrates on polymer solutions not dilute solutions or polymer melts From centrifugation and solvent dynamics to viscosity and diffusion experimental measurements and their quantitative representations are the core of the discussion The book reveals several experiments never before recognized as revealing polymer solution properties A novel approach to relaxation phenomena accurately describes viscoelasticity and dielectric relaxation and how they depend on polymer size and concentration Ideal for graduate students and researchers interested in the properties of polymer solutions the book covers real measurements on practical systems including the very latest results Every significant experimental method is presented in considerable detail giving unprecedented coverage of polymers in solution **Report of the Secretary of the Senate** United States.
