

Earthworm Dissection Lab

Objectives:

- To learn the external and internal anatomy of the earthworm.
- To understand the structure and function of external and internal organs.
- To know the digestive, circulatory, reproductive and nervous system.

Directions:

Using pages 79-82 in your INB, write a lab report with the following sections.

Title – Earthworm Dissection Lab

Introduction – Write a **7 sentence** introduction. You decide what kind of information is appropriate for this section.

Materials – gloves, goggles, apron, earthworm, dissection pan, dissection tool kit, magnifying glass, paper towel

Procedure – After reading the following procedures, cut and paste them into your INB.

External Anatomy

1. Go back to the sketch you made of the external anatomy of the earthworm on page 76. Use that to help you identify the **ventral** side (flatter), the **dorsal** side, plus: **anterior**, **posterior**, **clitellum**, **mouth**, and **anus**.
2. Count the number of segments on your earthworm, record in a data table labeled Table 1.
3. Record the length of your earthworm in cm in Table 1.
4. Record how many segments between the **mouth** and the **clitellum** in Table 1.
5. Look at the ventral side of the earthworm with the magnifying lens; look for the **oviducts**, which hold the eggs, open on the fourteenth segment. The **sperm ducts** open on the fifteenth. Record these two structures on the external anatomy sketch you made on page 76.
6. Run your fingers along the sides of the worm, towards the ventral side, you will feel bristles called **Setae**.
7. Pin your earthworm, ventral side down, through the anterior and posterior regions.
