Muciiri was taught by his parents that there was only one God who created the heavens and the earth That God controlled everything He was to be feared and obeyed Humphrey had no clue how to obey God Although characters such as Abraham Moses and David are considered great men of God they disobeyed Him Jesus Christ is the only human being who fully obeyed God and died to save humankind from eternal damnation He became the model for humankind to emulate to live happily and joyfully now and hereafter Humphrey wanted to have a happy and joyful life now and hereafter He regularly read the Bible attended church every Sunday to please God by doing good But human nature drove him to do evil deeds He became greatly disturbed and conflicted about what to do After high school the Holy Spirit revealed to him that it was by God's grace he would be saved through faith in Jesus Christ It was not through striving but through God's gift and so he could not boast about it Ephesians 2:9 GNB 1994 Even after believing in Jesus Christ he still could not claim to be sinless But by regular Bible reading he found that when he confessed his sins to God he had peace in his heart because he was forgiven of all wrongdoing 1 John 1:8-9 GNB 1994 He is continually being shaped by God to the likeness of Jesus Christ Later Humphrey earned a bachelor of science degree from University of Nairobi Kenya a master of arts from Daystar University Nairobi Kenya and a Ph.D in Organization and Management from Capella University Minneapolis Minnesota U.S.A Over three decades before coming to the United States he worked as an entrepreneur and a manufacturing executive in multinational

did the Cold War play in facilitating the merger of the two East African countries Was it an African initiative by the nationalist leaders of Tanganyika and Zanzibar to unite the two countries Did Pan Africanism and pan African solidarity play a primary or a minor role Or was it the prime determinant Other factors include fear of a communist regime which could have been established in Zanzibar after the revolution turning the island nation into what the United States and other Western powers feared would be the Cuba of Africa security concerns by Tanganyika if Zanzibar so close to the mainland were to have a hostile regime or became unstable thus posing a threat to the mainland fear by Zanzibari leaders especially President Abeid Karume who was worried that his political enemies especially the Marxist Leninist Abdulrahman Mohamed Babu could oust him from power and the only way he could be secure would be by uniting his country with Tanganyika for protection by a bigger and more powerful neighbour What role if any did all those factors play in the unification of the two countries Why did Zanzibari leaders such as Kassim Hanga and even Abdulrahman Babu well known Marxist Leninists support the union with Tanganyika knowing full well that it would deprive them of their power base in Zanzibar and thus make them allies of their enemies the United States and other Western powers who encouraged the merger of the two countries to neutralise them to prevent them from establishing a communist regime in Zanzibar that would pose a threat to Western geopolitical and strategic interests in the region and in Africa as a whole And why do the leaders of Tanzania mainland want to maintain the union at any cost although Zanzibar is an economic burden on the mainland The book includes some declassified material and interviews with senior American diplomats who were in Tanganyika and Zanzibar when the merger of the two countries took place Mathematics Education in East Africa Anjum Halai, Geoff Tennant, 2016-03-08 This Open Access book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place It is also a valuable resource for courses in mathematics education in the teacher education colleges and departments of education in the sub Saharan Africa region In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility Hence countries and development agencies in the broader sub Saharan Africa region are looking towards increasing access to relevant and high quality secondary education as a lever towards economic development Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education This book provides an in depth comparative analysis of the developments and issues in mathematics education in Kenya Tanzania Rwanda and Uganda and advances our understanding of the state of secondary mathematics education in East Africa **Nairobi Days** Shelina Shariff-Zia, 2017-10-18 This diaspora novel is a celebration of Indian and African culture seen through the eyes of a young woman As a member of an Indian minority in a small African country Shaza's life is complicated She lives in a lively house

full of relatives Later she meets Idi Amin the bloodthirsty Ugandan dictator and has a narrow escape Shaza goes to a convent school Despite the strict rules the girls are beginning to discover the opposite sex Shaza is part of a Muslim family that emigrated from India the old ways still rule No one in Kenya dates they just sneak around Shaza falls for a Hindu boy Sameer is smitten but they come from two different religions Shaza is torn between her sense of duty and longing for Sameer Will the relationship survive her family's disapproval and a long separation They live in difficult times in a turbulent African country Shaza's cousin is almost killed by thugs and Kenya has a coup d'état where the Indian minority is targeted The saga follows Shaza's life from the 1960s to the 1980s showing the political upheavals in Kenya and her move to the United States Nairobi Days is a coming of age story a love story a political novel and above all a celebration of life **Halvorsen: Sharing**

Knowledge, Transforming Societies, 2023-01-10 In June 2016 the Norwegian Programme for Capacity Development in Higher Education and Research for Development Norhed hosted a conference on the theme of knowledge for development in an attempt to shift the focus of the programme towards its academic content This book follows up on that event The conference highlighted the usefulness of presenting the value of Norhed's different projects to the world showing how they improve knowledge and expand access to it through co-operation A wish for more meta-knowledge was also expressed and this gives rise to the following questions Is this way of co-operating contributing to the growth of independent post-colonial knowledge production in the South based on analyses of local data and experiences in ways that are relevant to our shared future Does the growth of academic independence as well as greater equality and the ability to develop theories different to those imposed by the better off parts of the world give rise to deeper understandings and better explanations Does it at least spread the ability to translate existing methodologies in ways that add meaning to observations of local context and data and thus enhance the relevance and influence of the academic profession locally and internationally This book in its varied contributions does not provide definite answers to these questions but it does show that Norhed is a step in the right direction Norhed is an attempt to fund collaboration within and between higher education institutions We know that both the uniqueness of this programme and ideas of how to better utilise the learning and experience emerging from it call for more elaboration and broader dissemination before we can offer further guidance on how to do things better This book is a first attempt
