Pathways to Alternative Epistemologies in Africa Adeshina Afolayan,Olajumoke Yacob-Haliso,Samuel Ojo Oloruntoba,2021-01-04 This volume investigates alternative epistemological pathways by which knowledge production in Africa can proceed The contributors using different intellectual dynamics explore the existing epistemological dominance of the West from architecture to gender discourse from environmental management to democratic governance and offer distinct and unique arguments that challenge the denigration of the different and differing modes of knowing that the West considered barbaric and primitive This volume therefore constitutes a minimal gesture that further contributes to the ongoing discourse on alternative modes of knowing in Africa      **Africa's Buildings** Itohan I. Osayimwese,2025-09-23 A groundbreaking history of Africa s looted architectural heritage and a bold proposal for the repatriation of the continent s stolen cultural artifacts Between the nineteenth century and today colonial officials collectors and anthropologists dismembered African buildings and dispersed their parts to museums in Europe and the United States Most of these artifacts were cataloged as ornamental art objects which erased their intended functions and the removal of these objects often had catastrophic consequences for the original structures Africa s Buildings traces the history of the collection and distribution of African architectural fragments documenting the brutality of the colonial regimes that looted Africa s buildings and addressing the ethical questions surrounding the display of these objects Itohan Osayimwese ranges across the whole of Africa from Egypt in the north to Zimbabwe in the south and spanning the western central and eastern regions of the continent She describes how collectors employed violent means to remove elements such as columns and door panels from

buildings and how these methods differentiated architectural collecting from conventional collecting She shows how Western collectors mischaracterized building components as ornament erasing their architectural character and concealing the evidence of their theft Osayimwese discusses how the very act of displacing building parts like floor tiles and woven screen walls has resulted in a loss of knowledge about their original function and argues that because of these removals scholars have yet to fully grasp the variety and character of African architecture Richly illustrated *Africa's Buildings* uncovers the vast scale of cultural displacement perpetrated by the West and proposes a new role for museums in this history one in which they champion the repatriation of Africa's architectural heritage and restitution for African communities
