Formal Methods for Components and Objects Frank S.de Boer,Marcello Bonsangue,Susanne Graf,Willem-Paul de Roever,2003-12-01

Large and complex software systems provide the necessary infrastructure in all industries today. In order to construct such large systems in a systematic manner, the focus in the development methodologies has switched in the last two decades from functional issues to structural issues. Both data and functions are encapsulated into software units that are integrated into large systems by means of various techniques supporting reusability and modifiability. This encapsulation principle is essential to both the object-oriented and the more recent component-based software engineering paradigms. Formal methods have been applied successfully to the verification of medium-sized programs in protocol and hardware design. However, their application to large systems requires the further development of specification and verification techniques supporting the concepts of reusability and modifiability. In order to bring together researchers and practitioners in the areas of software engineering and formal methods, we organized the 1st International Symposium on Formal Methods for Components and Objects (FMCO) in Leiden, The Netherlands, November 5-8, 2002. The program consisted of invited tutorials and more technical presentations given by leading experts in the fields of Theoretical Computer Science and Software Engineering. The symposium was attended by more than 100 people. This volume contains the contributions of the invited speakers to FMCO 2002. We believe that the presented material provides a unique combination of ideas on software engineering and formal methods, which we hope will be an inspiration for those aiming at further bridging the gap between the theory and practice of software engineering.

BEA WebLogic Server 8.1 Unleashed Mark Artiges, 2004. With the release of WebLogic Server 7.0 in June 2002, BEA positioned WebLogic Server as the premier J2EE Web Services development platform. With the next release in late 2002, WLS will integrate WebLogic Workshop and other key tools to provide developers with a stable market-leading product designed for the next generation of Java applications based on Web Services on the latest J2EE platform. BEA WebLogic Server is the leading J2EE application server, holding almost 40% of the market share in this competitive category. WebLogic Server Unleashed is designed to be the definitive reference work for the WLS developer, offering an in-depth look at the capabilities provided by WLS 7.X and illustrating the best development practices. *Java Design* Kirk Knoernschild, 2002. Discusses how the unified modeling language (UML) can be used during the implementation stage of the Java software development lifecycle. The book focuses on refactoring or cleaning up the design of existing code and addresses the most common and significant decisions made during enterprise Java development. The author identifies initial analysis classes, introduces the UML sequence diagram, and demonstrates architectural modeling. Annotation copyrighted by Book News, Inc., Portland, OR.

Component-Based Software Quality Alejandra Cechich, Mario Piattini, Antonio Vallecillo, 2003-11-06. Component-based software development (CBSD) is no longer just one more new paradigm in software engineering; but it is effectively used in development and practice. So far, however, most of the efforts from the software engineering community have concentrated on the functional aspects of CBSD, leaving aside the treatment of the quality issues and extra-functional properties of software components and component-based systems. The 16 revised chapters presented were carefully reviewed.

and selected for inclusion in the book together with an introductory survey they give a coherent and competent survey of the state of the art in the area The book the first to focus on quality issues of components and component based systems is organized in topical parts on COTS selection testing and certification software component quality models formal models to quality assessment and CBSD management *eWork and eBusiness in Architecture, Engineering and Construction* Z.
