E. Thalheimer, 2000 Several causes have lately augmented both the means and the motives for a more thorough study of History Modern criticism no longer accepting primitive traditions venal eulogiums partisan pamphlets and highly wrought romances as equal and trustworthy evidence merely because of their age is teaching us to sift the testimony of ancient authors to ascertain the sources and relative value of their information and to discern those special aims which may determine the light in which their works should be viewed The geographical surveys of recent travelers have thrown a flood of new light upon ancient events and above all the inscriptions discovered and deciphered within half a century have set before us the great actors of old times speaking in their own persons from the walls of palaces and tombs Nor is the new knowledge of little value If we look familiarly into the daily life of our fellow men thousands of years ago it is to find them toiling at the same problems which perplex us suffering the same conflict of passion and principle failing it may be for our warning or winning for our encouragement in any case reaching results which ought to prevent our repeating their mistakes The national questions which fill our newspapers were discussed long ago in the Grove the Agora and the Forum the relative advantages of government by the many and the few were wrought out to a demonstration in the states and colonies of Greece and no man whose vote no woman whose influence may sway in ever so small a degree the destinies of our Republic can afford to be ignorant of what has already been so wisely and fully accomplished Present tasks can only be clearly seen and worthily performed in the light of long experience and that liberal acquaintance with History which under a monarchical government might safely be left as an ornament and privilege to the few is here the duty of the many The present work aims merely to afford a brief though accurate outline of the results of the labors of Niebuhr Bunsen Arnold Mommsen Rawlinson and others results which have never so far as we know been embraced in any American school book but which within a few years have greatly increased the treasures of historical literature While it may have been impossible within our limits to reproduce the full and life like outlines in which they have portrayed the characters of ancient times we have sought with their aid at least to ascertain the limits of fact and fable With

but few exceptions and those clearly stated as such we have introduced no narrative which can reasonably be doubted The writer is more confident of justice of aim than of completeness of attainment No one can so acutely feel the imperfections of a work like this as the one who has labored at every point to avoid or to remove them to compress the greatest amount of truth into the fewest words and while reducing the scale to preserve a just proportion in the details To hundreds of former pupils who have never been forgotten in this labor of love and to the kind judgment of fellow teachers some of whom well know that effort has not been spared even where ability may have failed this Manual is respectfully submitted **Advanced Reef Keeping: Theory, equipment, instrumentation, installation** Albert J.
