have remarkably broad discretion to use deadly force Evidence shows that more than 1 000 shooting deaths occur each year at the hands of the police in the United States disproportionately in minority communities and often under questionable circumstances Despite public outrage there continue to be obstacles to assessing the extent of bias and addressing the harms

of police violence including a lack of transparency and limitations on access to data *Justice Required* is a groundbreaking quantitative and qualitative investigation of police violence Robert J. Duran and Oralia Loza provide a comprehensive data analysis of all police shootings in Denver Colorado over nearly forty years highlighting persistent patterns of racial and ethnic inequality They examine the institutional and political dynamics that thwart efforts to hold police officers accountable after controversial incidents Duran and Loza contextualize the data with regional comparisons and enliven the analysis with vivid storytelling *Justice Required* argues that while police shootings are typically treated as a criminal justice issue they should be understood as a public health problem Rigorous and urgent this book provides evidence based data driven solutions to prevent further loss of life and promote accountability *Gold Medal Policing* Judy M. used often critically to characterise the working attitudes and behaviours of usually uniformed police officers. It is shorthand for a workplace imbued with machismo, racism, sexism, a thirst for danger and excitement, cynicism and conservatism. Rather than looking for culture or identifying how culture affects behaviours, this book identifies factors that influence the decisions and actions, including technology, targets, training, timing, intelligence, geography and supervision, thus reassembling police culture much as Bruno Latour sought to reassemble the social. The analysis develops a clearer and critical understanding of culture by explicitly connecting the debates about police culture to those about organisational culture. Offering a detailed ethnography of two shifts, it grounds the analysis of the idea of police culture in a thick description of the day-to-day activities observed in the police station and the patrol car, rather than using brief illustrative extracts. The book dispenses with any assumption of the utility of the concept of police culture, not least because it is opaque and reassembles our understanding of policing and if it retains any relevance of police culture. An accessible and compelling read, this book will appeal to students and scholars of policing, criminology, sociology, law, politics and all those interested in the day-to-day lives of police officers.
