Poole,2005 This monograph focuses specifically on the involvement of the Chairman of the Joint Chiefs of Staff and the Joint Staff in planning and directing the operations in Somalia from August 1992 to March 1994 The study begins with a discussion of the conditions and circumstances that in August 1992 led President George H W Bush to direct the American military to support relief efforts in Somalia and ends with the final withdrawal of United States forces in 1994 Famine in Cambodia James A. Tyner,2023-04-15 This book examines three consecutive famines in Cambodia during the 1970s exploring both continuities and discontinuities of all three Cambodia experienced these consecutive famines against the backdrop of four distinct governments the Kingdom of Cambodia 1953 1970 the U S supported Khmer Republic 1970 1975 the communist Democratic Kampuchea 1975 1979 and the Vietnamese controlled People s Republic of Kampuchea 1979 1989 Famine in Cambodia documents how state induced famine constituted a form of sovereign violence and operated against the backdrop of sweeping historical transformations of Cambodian society It also highlights how state induced famines should not be solely framed from the vantage point in which famine occurs but should also focus on the geopolitics of state induced famines as states other than Cambodia conditioned the famine in Cambodia Drawing on an array of theorists including Michel Foucault Giorgio Agamben and Achille Mbembe James A Tyner provides a conceptual framework to bring together geopolitics biopolitics and necropolitics in an effort to expand our understanding of state induced famines Tyner argues that state induced famine constitutes a form of sovereign violence a form of power that both takes life and disallows life
Educational Times ,1916 *A Constructed Peace* Marc Trachtenberg,2020-06-16 People still think of the Cold War as a simple two sided conflict a kind of gigantic arm wrestle on a global scale writes Marc Trachtenberg but this view fails to grasp the essence of what was really going on America and Russia were both willing to live with the status quo in Europe What then could have generated the kind of conflict that might have led to a nuclear holocaust This is the great puzzle of the Cold War and in this book the product of nearly twenty years of work Trachtenberg tries to solve it The answer he says has to do with the German question especially with the German nuclear question These issues lay at the heart of the Cold War and a relatively stable peace took shape only when they were resolved The book develops this argument by telling a story a complex story involving many issues of detail but focusing always on the central question of how a stable international

system came into being during the Cold War period A Constructed Peace will be of interest not just to students of the Cold War but to people concerned with the problem of war and peace and in particular with the question of how a stable international order can be constructed even in our own day *Astronautics and Aeronautics, 1979-1984: A Chronology*
