Shooting Polaris John Hales, 2013-04-24 Shooting Polaris is John Hales's fascinating and far reaching account of working as a government surveyor in the southern Utah desert. In it he describes his search for a place in the natural world beginning with an afternoon spent tracking down a lost crew member who cracked up on the job and concluding with his supervising a group of at risk teenagers on a backpacking trip in the Escalante wilderness. In between he depicts a range of experiences in and outside nature including hostile barroom encounters between surveyors and tourists, weekends spent climbing Navajo Mountain and floating what remains of Glen Canyon and late night arguments concerning the meaning and purpose of nature with the eccentric polygamist who ran the town in which the surveyors parked their bunk trailers. Although this work is autobiographical, Shooting Polaris is so much more. It is a reflection on man's relationship to nature and work, American history and the movement into the West, the desire to impose order and the contrary impulse for unmediated experience, the idealistic legacy of the sixties, the influence of the Mormon Church and the often antagonistic relationship of American capitalism to sound ecological management. Along the way Hales introduces engaging characters and reveals the art, science and history of surveying an endeavor that turns out to be surprisingly profound. **Routledge Handbook of**

Evidence-Based Criminal Justice Practices Edelyn Verona, Bryanna Fox, 2023-10-31 Now more than ever the criminal justice system and the programs, policies and practices within it are subject to increased public scrutiny due to well founded concerns over effectiveness, fairness and potential unintended consequences. One of the best means to address these concerns is to draw upon evidence based approaches demonstrated to be effective through empirical research rather than through anecdote, standard practice or professional experience alone. National Institute of Justice 2011. The goal of this book is to describe the most useful, actionable and evidence based solutions to many of the most pressing questions in the criminal justice system today. Specifically, this edited volume contains brief and accessible summaries of the best available research alongside detailed descriptions of evidence based practices across different areas of the criminal justice system. It is written so that practitioners and researchers alike can use the text as a reference tool in their work and in training the new generation of individuals working to improve the system. Researchers and practitioners in many areas of criminal justice, crime prevention, policing, courts, prosecution, defendants, judges, corrections, sanctions and sentencing can reference specific chapters in this book to guide their policy and practice decisions. Although theory is a guide for the practices described, the chapters will address practical issues in implementation and action. This book overcomes the limitations of previous criminal justice practice books in that it is written as a practice resource and reference guide and spans practices and policies across different sectors of the criminal justice system from prevention to policing to sanctions and corrections. Each chapter contains a list of action items based upon the best available scientific research that can be implemented in practice to address key issues and long standing challenges in the criminal justice system. **The Surveying Handbook** Russell C.
