Superintendent of Documents, 1978 Executive Functions in Psychiatric Disorders Leandro Fernandes Malloy-Diniz, Débora Marques de Miranda, Rodrigo Grassi-Oliveira, 2017-10-17 Executive Functions comprise a range of neuropsychological processes related to intentional behavior and cognitive control There are several theoretical models defining and explaining the concept of Executive Functions Most of these models consider that the term Executive Functions encompasses cognitive process as working

memory cognitive flexibility inhibitory control and other complex functions as planning problem solving and abstract reasoning Other models argue that motivational and emotional functions such as affective decision making reside under the concept of Executive Function Much evidence supports how complex cognitive functions are related to the physiological activity of brain networks including the frontal cortex and its connections with subcortical structures Several psychiatric disorders related to impairment in these brain networks eq bipolar disorder schizophrenia ADHD obsessive compulsive disorder and drug addiction leading to deficits in Executive Functions These cognitive deficits affect patients everyday functioning worsening the clinical course of the disease For example deficits in Executive Functions are related to suicide behavior in bipolar disorder patients Furthermore these deficits also relate to obesity a lack of adherence to treatment and an underperformance in the workplace and educational settings The understanding of the role of deficits in Executive Functions including its neurobiological basis developmental trajectories and relationship with clinical outcomes is fundamental to improve clinical management of psychiatric patients This research topic includes 13 articles with interdisciplinary contributions related to the understanding of the deficits in Executive Functions and its relationship with clinical manifestations in psychiatric disorders **Passionate Work** Renyi Hong, 2022-04-04 In Passionate Work Renyi Hong theorizes the notion of being passionate about your work as an affective project that encourages people to endure economically trying situations like unemployment job change repetitive and menial labor and freelancing Not simply a subject of aspiration passion has been deployed as a means to build resilience and mend disappointments with our experiences of work Tracking the rise of passion in nineteenth century management to trends like gamification coworking and unemployment insurance Hong demonstrates how passion can emerge in instances that would not typically be understood as passionate Gamification numbs crippling boredom by keeping call center workers in an unthinking suspensive state pursuing even the most banal tasks in hope of career advancement Coworking spaces marketed toward freelancers combat loneliness and disconnection at the precise moment when middle class sureties are profoundly threatened Ultimately Hong argues the ideal of passionate work sustains a condition of cruel optimism in which passion is offered as the solution for the injustices of contemporary capitalism **Biology and Evolution of the Mollusca, Volume 1** Winston Frank Ponder, David R. Lindberg, Juliet Mary Ponder, 2019-11-18 Molluscs comprise the second largest phylum of animals after arthropods occurring in virtually all habitats Some are commercially important a few are pests and some carry diseases while many non marine molluscs are threatened by human impacts which have resulted in more extinctions than all tetrapod vertebrates combined This book and its companion volume provide the first comprehensive account of the Mollusca in decades Illustrated with hundreds of colour figures it reviews molluscan biology genomics anatomy physiology fossil history phylogeny and classification This volume includes general chapters drawn from extensive and diverse literature on the anatomy and physiology of their structure movement reproduction feeding digestion excretion respiration nervous system

and sense organs Other chapters review the natural history including ecology of molluscs their interactions with humans and assess research on the group Key features of both volumes up to date treatment with an extensive bibliography thoroughly examines the current understanding of molluscan anatomy physiology and development reviews fossil history and phylogenetics overviews ecology and economic values and summarises research activity and suggests future directions for investigation Winston F Ponder was a Principal Research Scientist at The Australian Museum in Sydney where he is currently a Research Fellow He has published extensively over the last 55 years on the systematics evolution biology and conservation of marine and freshwater molluscs as well as supervised post graduate students and run university courses David R Lindberg is former Chair of the Department of Integrative Biology Director of the Museum of Paleontology and Chair of the Berkeley Natural History Museums all at the University of California He has conducted research on the evolutionary history of marine organisms and their habitats on the rocky shores of the Pacific Rim for more than 40 years The numerous elegant and interpretive illustrations were produced by Juliet Ponder **Monthly Catalog of United States Government** Publications ,1968 Who's who in America ,1926 **Decennial Cumulative Personal Author Index 1951-1960 Navigation Manual Great** Edward Przebienda, 1971 The Yachtsman's Navigation Manual Jeff Toghill, 2003 Ultimate Navigation Manual Lyle Brotherton, 2011 All the techniques you Britain.
