Congress. House. Committee on Appropriations. Subcommittee on Transportation, Housing and Urban Development, and Related Agencies, 2015 *Sustainability* Felix Ekardt, 2024-07-15 This book proposes a holistic transdisciplinary approach to sustainability and post fossil societies as a subject of social sciences at a time when post fossilisation is becoming a core political concern due to the aggressive foreign policy of autocracies also for reasons beyond sustainability Furthermore the book shows new ways as perspectives of philosophy political science law economics sociology cultural studies and others are here no longer regarded separately Instead integrated perspectives on the key issues are carved out Perspectives on conditions of transformation to sustainability on key instruments and the normative questions This allows for a concise answer to urgent and controversial questions such as the following Is the EU an environmental pioneer Is it possible to achieve sustainability by purely technical means If not will that mean to end of the growth society How to deal with the follow up problems How will societal change be successful Are political power and capitalism the main barriers to sustainability What is the role of emotions and conceptions of normality in the transformation process To which degree are rebound and shifting effects the reason why sustainability politics fail How much climate protection can be claimed ethically and legally e g on grounds of human rights And what is freedom Despite all rhetoric the weak transition in energy climate agriculture and conservation serves as key example in this book It is shown how the Paris Agreement is weak with regard to details and at the same time overrules the growth society by means of a radical 1 5

degrees temperature limit It is shown how emissions trading must and can be reformed radically It is shown why CSR education cooperation and happiness research are overrated And we will see what an integrated politics on climate biodiversity nitrogen and soil might look like This book deals with conditions of transformation governance instruments ethics and law of sustainability The relevance of the humanities to sustainability has never before been demonstrated so vividly and broadly as here And in every area it opens up some completely new perspectives Algal Biotechnology Nivedita Sahu,S. Sridhar,2024-08-30 This book initiates with a general introduction to microalgae and algal biotechnology with subsequent discussions on all the significant aspects of applied biotechnology bioremediation nano applications multidimensional usages of algae as a biofertilizer and a source of bioactive compounds and phytochemicals Major themes of the book include algae and the environment bioremediation using algae algal omics and applications and large scale bioprocesses for algal cultivation its constraints and challenges Features Focusses on the importance of algae for a sustainable environment Covers algal bioplastics and other commercial products Explores possible utilization of algae in phyco bioremediation Reviews algae as a biostimulant and biofertilizer Demonstrates challenges during algal cultivation on a large scale This book is aimed at graduate students and researchers in biotechnology bioenergy renewable energy energy bioremediation fuel and petrochemicals wastewater novel technologies clean technologies bioremediation environmental functional foods and nutraceuticals marine and aquatic science Research Anthology on Reliability and Safety in Aviation Systems, Spacecraft, and Air Transport Management Association, Information Resources,2020-09-24 As with other transportation methods safety issues in aircraft can result in a total loss of life Recently the air transport industry has come under immense scrutiny after several deaths occurred due to aircraft design and airlines that allowed improperly inspected aircraft to fly Spacecraft too have found errors in system software that could lead to catastrophic failure It is imperative that the aviation and aerospace industries continue to revise and refine safety protocols from the construction and design of aircraft to secure and improve aviation systems and to test and inspect aircraft The Research Anthology on Reliability and Safety in Aviation Systems Spacecraft and Air Transport is a vital reference source that examines the latest scholarly material on the use of adaptive and assistive technologies in aviation to establish clear guidelines for the design and implementation of such technologies to better serve the needs of both military and civilian pilots It also covers new information technology use in aviation systems to streamline the cybersecurity decision making planning and design processes within the aviation industry Highlighting a range of topics such as air navigation systems computer simulation and airline operations this multi volume book is ideally designed for pilots scientists engineers aviation operators air traffic controllers air crash investigators teachers academicians researchers and students **Cases on Modern Computer Systems in Aviation** Shmelova, Tetiana,Sikirda, Yuliya,Rizun, Nina,Kucherov, Dmytro,2019-02-19 Because trainees need to learn about the underlying technologies to use automation safely and efficiently the development of automated aviation

systems training is a growing challenge Task analysis has been singled out as the basis of the training but it can be more time consuming than traditional development techniques Cases on Modern Computer Systems in Aviation is an essential reference source that covers new information technology use in aviation systems to streamline the cybersecurity decision making planning and design processes within the aviation industry Featuring coverage on a broad range of topics such as computer systems in aviation artificial intelligence software defined networking SDN air navigation systems decision support systems DSS and more this publication is ideally designed for aviation specialists and industry professionals technicians practitioners researchers and academicians seeking current research on modern modeling approaches to streamline management in aviation

Advanced Design of Pile Foundations Under Lateral Loading Wei Dong Guo,2023-12-15 This book presents models that capture the nonlinear response of piles subjected to lateral forces Utilising a consistent approach encompassing new mathematical models it offers solutions presented as closed form expressions and underpinned by the same set of 3 5 measurable soil input parameters These focus on nonlinear response of mono piles anchored piles pile groups and torsional piles as well as passive piles subjected to soil movement induced in shearing sliding slopes or excavation and earthquake shaking The models can also be used for pipelines and similar beam structures Solutions are provided in the form of design charts with each parameter obtained using available test data and illustrated with real world cases The models reveal for the first time the mysterious mechanisms of amplification resulting from back rotation which have incurred the collapse of structures such as the Showa Bridge and Nicoll Highway as well as the distortion of piles during earthquakes Advanced Design of Pile Foundations Under Lateral Loading is ideal for practicing foundation engineers and students at graduate level Wei Dong Guo is co founder of Hans Innovation Group and former Associate Professor at the University of Wollongong Australia He is a Chartered Professional Engineer and is a Fellow of Engineers Australia by whom he was awarded the 2012 Warren Medal

Mainstreaming Climate Co-Benefits in Indian Cities Mahendra Sethi,Jose A. Puppim de Oliveira,2018-02-06 This volume presents a novel framework to understand urban climate co benefits in India that is tackling climate change and achieving sustainable development goals in cities It utilizes methods and tools from several assessment frameworks to scientifically evaluate sector co benefits for informed decision making The co benefits approach can lead to significant improvements in the way societies use environmental resources and distribute their outputs The volume discusses four main themes 1 Concepts and theories on cities and climate co benefits 2 Contextualizing co benefit issues across spatial scales and sectors 3 Sectoral analyses of co benefits in energy transport buildings waste and biodiversity and 4 Innovations and reforms needed to promote co benefits in cities The discussions are based on empirical research conducted in Indian cities and aligned with the international discourse on the 2030 UN Development Agenda and New Urban Agenda created at the UN Habitat III in 2016 The analyses and recommendations in this volume are of considerable interest to policy experts scholars and researchers of urban and regional studies geography public policy
