contributed a chapter on The Future of Computing beyond Moore's Law The final update for this edition is an attempt to capture Feynman's interest in artificial intelligence and artificial neural networks Eric Mjolsness now a Professor of Computer Science at the University of California Irvine was a Teaching Assistant for Feynman's original lecture course and his research interests are now the application of artificial intelligence and machine learning for multi scale science He has contributed a chapter called Feynman on Artificial Intelligence and Machine Learning that captures the early discussions with Feynman and also looks toward future developments This exciting and important work provides key reading for students and scholars in the fields of computer science and computational physics
