

KPMG – Case Study

Case Study: Purchaser

Purchaser is a mid-sized Austrian competitor of the target, which is more or less of the same size with slightly better profits. It expects huge synergies within the areas of cost savings (procurement, warehouse), restructuring of the network of outlets and therefore is very interested in taking part and winning this tender auction. P is very inexperienced in transactions like this and is currently looking for advisors.

1) What is the goal of the group? How do you define a successful transaction?

- We are not sure what you mean by the group. By our group we will consider Purchaser (us), Purchaser Advisor and Due Diligence Team.
- The goal of the Purchaser is to acquire the competitor to exploit economies of scale (cost reduction). The goal of other actors in our group is to help to realize the acquisition.
- The transaction can be considered successful (for the purchaser) if the expected financial benefit of economies of scale exceeds the cost of purchase of the target (and associated with that costs, such as research, advisors, etc.) — basically positive NPV.
- A further goal is to increase market power by acquiring the competitor to solidify our position in the market.

2) What kind of information do you currently have? Will you be asking for any further information during the process? If yes, what kind of information is that going to be?

- We have just received a short target profile paper, a draft of an NDA and an invitation to take part in the tender from the Seller Advisor.
- So, right now we know basic information about the target: it has 90 shops all over Austria, 1 central warehouse, stable revenues and low profits.
- As we are interested in the offer, we are going to request further information. We are going to request an information memorandum, containing a more detailed overview of the business model, intellectual property, technology, distribution channels, infrastructure, staff and financials of the target.

3) Think about the previously discussed process timeline. When will most of your resources be needed during the process?

- The timeline can be divided in 4 parts: preparation, marketing, due diligence and closing.
- As we outsource due diligence to the Due Diligence Team, we consider this stage to be less resourceful than the closing stage. The closing stage and negotiations require a lot of resources to ensure that we do not overlook any legal issues and overpay for the identified weaknesses of the target.
- Since we are interested in acquiring the target company, we will have to evaluate our capital needs to fund the transaction and be advised on the optimal debt/equity stack.

Banking Resilience: New Insights On Corporate Governance, Sustainability And Digital Innovation Sabri Boubaker, Marwa Elnahass, 2024-01-23 The banking industry plays a critical role in ensuring global economic and financial stability. Effective governance is essential for mitigating bank risk taking and limiting managerial opportunism in this industry which is constantly under regulatory and market scrutiny. However, the complexity and diversity of banking financial instruments and transactions gives rise to substantial information asymmetries and ongoing debates regarding contemporary governance, sustainability, and data innovation issues. This book is one of the first to address these contemporary issues collectively, offering a comprehensive and holistic understanding of the challenges and opportunities facing the global banking industry. It provides new insights, evidence-based recommendations, and future perspectives on the role of governance mechanisms, digital innovation, climate change, and green finance in shaping the industry pre and post COVID-19. The book is a valuable resource for a wide range of stakeholders in the banking sector, including international regulators, practitioners, policymakers, institutional investors, and auditors. It features contributions from renowned international scholars and offers a variety of theoretical, empirical, and policy-based perspectives. It provides updated evidence and new insights crucial for rethinking the global banking model and dominant regulations, and offers evidence-based recommendations and measures for promoting financial stability and resilience in this industry.

Integrated Reporting Cristiano Busco, Mark L. Frigo, Angelo Riccaboni, Paolo Quattrone, 2013-11-27 This book focuses on Integrated Reporting as a contemporary social and managerial innovation where a number of initiatives, organizations, and individuals began to converge in response to the need for a consistent, collaborative, and internationally accepted approach to redesign corporate reporting. Integrated Reporting is a process that results in communication of the annual integrated report which describes value creation over time. An integrated report is a concise communication about how an organization's strategy, governance, performance, and prospects lead to the creation of value over the short, medium, and long term. This book offers a fresh perspective with expert contributions focusing on both the theoretical underpinnings and the practical challenges for the future of corporate reporting.

Digital Deception Christopher Murphy, 2025-07-08 A critical examination of the foundational flaws that have led to the current cybersecurity crisis. This book takes a historical approach to understanding how short-term decision making, driven by convenience and profit, compromised the long-term security of the internet. From the introduction of public access

to secure networks to the widespread deception associated with Multi Factor Authentication MFA this book uncovers the decisions both intentional and negligent that have allowed cybersecurity vulnerabilities to proliferate Divided into well structured chapters that trace the evolution of these issues Digital Deception provides a clear and fact based narrative that highlights where the system went wrong and why It also shines a light on the complicity of various actors vendors auditors corporate leaders and even educational institutions in perpetuating a broken system More than just a critique Digital Deception offers a path forward rooted in real computer science to restore trust and security in our digital world The book is especially relevant now as cyber threats continue to grow in scale and sophistication The facts presented here are not only essential for cybersecurity professionals but also for corporate leaders policymakers and anyone interested in the integrity of the digital economy

What You Will Learn Gain a deep understanding of the fundamental flaw in cybersecurity particularly the impact of public access to secure networks and the deception inherent in current MFA practices Recognize how various actors knowingly or unknowingly have contributed to the current cybersecurity crisis Implement real solutions with actionable strategies based on real computer science to address and correct these vulnerabilities paving the way for a more secure digital future A revolutionary concept of Direct User Interaction and Digital IDs as opposed to more traditional cybersecurity approaches like Zero Trust or perimeter security

Who This Book Is for This book is primarily written for cybersecurity professionals corporate leaders lawyers and policymakers It is also relevant to educators in the field of cybersecurity and anyone interested in the integrity of the internet The typical reader will have a basic understanding of cybersecurity but will be introduced to new concepts and facts that challenge conventional wisdom and encourage a rethinking of current practices
